Professional Experience:

Fullstack Developer
Apiary Investment Fund.
January 2018 – February 2022

- **Maintained and Enhanced Web Pages:** Regularly updated and maintained the company's web pages to ensure functionality and performance, fixing bugs and addressing user-reported issues.

- **Developed New Features:** Designed and implemented new features using React, CSS, and HTML, contributing to an improved user experience and increased user engagement.

- **Participated in Page Redesign Project:** Actively involved in a major project to rebuild the company's web page, collaborating with the team to re-architect the application with modern technologies and best practices.

- **Implemented User Authentication:** Integrated user authentication and authorization using JWT (JSON Web Tokens) to enhance security and manage user sessions effectively.

- **Managed Database Operations:** Utilized MongoDB for data management, ensuring efficient data storage and retrieval, and integrating it with the application backend.

- **Created User Profiles:** Developed user profile functionality, allowing users to create, view, and edit their profiles, enhancing personalization and user satisfaction.

QA Engineer
The Church of Jesus Christ of Latter-day Saints.
February 2022 – Present.
As a Quality Assurance Engineer at The Church of Jesus Christ of Latter-day Saints, I was responsible for testing user interfaces and RESTful APIs to ensure their functionality and performance. I collaborated with developers working on React applications to troubleshoot and resolve issues. I also created detailed use cases and test plans and employed DevOps practices to streamline the testing and deployment processes.
